DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 7, 2005 has been entered. Claims 14 and 26-43 are pending.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 14 and 27-43 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 26-39 of copending Application No. 10/967,481. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of the claims is directed to a composition comprising the diamides represented by the formula

(1) of claim 26, formula (I). The mixture of the diamides of claim 30 in the present application, the mixture of diamides having average $n = 1.7$ in formula (C) of claim 14 also meets claim 30 of the '481 application, which is directed to the composition comprising the same.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14 and 26-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

While claim 14 is directed to a "diamide derivative", a compound, the actual claimed subject matter appears to be a composition claim because average n is 1.7. It is recommended that the claim be amended to recite a composition or a compound selected from a Markush group (e.g., where n is selected from 1 to 100).

The term "derivative" in claims 14, 26, 27, and 43 render the claims vague and indefinite. It is not clear of what compound the claimed inventions are derivatized. It is not clear of what compound the diamide is derivatized. Deleting the term "derivative" is recommended.

The remaining claims are rejected as depending on indefinite base claims.

Allowable Subject Matter

Claims 14 and 26-43 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph and the judicially created doctrine of obvious double patenting, set forth in this Office action.

The following is an examiner's statement of reasons for allowance:

While Robbins et al. (US 4626429) teach diamides where the end groups R are neoalkyl groups of 4 – 13 carbon atoms. It is viewed that the claimed invention is not obvious over the prior art because the claimed diamide is substituted at the alpha position, having n-ethyl and n-butyl and one substitution at the beta position. The claimed invention and the prior art diamides with neoalkyl end groups are not viewed structurally similar as explained by applicants in Remarks filed on January 7, 2005.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments, see Response, filed on January 7, 2005, with respect to claim 14 have been fully considered and are persuasive. The rejection of claim 14 under 35 U.S.C. § 103 (a) as being unpatentable under Robbins et al. has been withdrawn.

Conclusion

No claims are allowed.
